

PFOS (Perfluroctane Sulfonate) Declaration

We, the undersigned, herewith declare in regard to *PFOS (Perfluroctane Sulfonate)*, that Allegro MicroSystems, Inc. parts do not contain and will not produce such chemical element.

Allegro MicroSystems, Inc., is pleased to provide our customers with information regarding the materials used in the manufacturing of our semiconductor products. We value our relationship and appreciate the need for environmental controls. Allegro considers itself to be an environmentally responsible company.

We believe that we are in compliance with all applicable local, state, federal, and international environmental regulations. To the best of our knowledge, applicable hazardous substances are not present, in excess of specified threshold limits, in the parts that Allegro sells. To assure compliance, we require that our material suppliers provide test reports from independent laboratories, which are typically updated on an annual basis. Such laboratories providing independent testing include SGS, ALS, NML, and Microbac.

Allegro takes environmental control seriously and we want to assure our customers that we are doing everything reasonably possible to maintain compliance with all environmental standards. However, because we are not the producer of any of the materials contained in our product, notwithstanding anything to the contrary contained in any document, Allegro shall not be liable, under any theory of law, and shall not be responsible to defend or indemnify any party should any material be out of compliance. We believe the controls we have in place will help to assure that Allegro remains compliant. We remain willing to answer any questions you may have regarding our environmental controls.
